

CRI Internship Project Description

If you are interning with the CRI exclusively, you will be required to complete an independent project for the CRI based on your stated internship goals and desired skill development.

- We will be helping you brainstorm these projects but you can also consult Prof Hiott or other faculty members for ideas.
- Project examples could include: Video contributions, social media management, graphic design project, digital design project, targeted social media campaign, independent research project, etc.
- These projects will be tailored to your goals but we also expect a high level of work. These projects should be usable by the CRI for content creation or business development.
- You will be required to submit a project outline, as well as project updates every 3 weeks throughout the probationary period. The due dates for these updates can be found in the lessons for the internship online component.
- The scope and size of the project should be explicit and manageable given the time constraints of the internship. It will require you to demonstrate skills in planning, time management, and collaborative work.
- You will need to submit a professional report (either in PPT or video format) that includes:
 - A summary of the work you did during your internship.
 - How you were able to work on your 3 internship goals.
 - What challenges you faced and how you dealt with them.
 - What you learned about yourself, your possible career path, and the the work you produced.

Due on December 1st, 12pm EST: Final Project & Professional Report
